

Legend has always had wonderful things to say
about the strain of Saqlawi Jidran of Ibn Sudan.

I recall as a young man hearing the story
of how Abbas Pasha, ruler of Egypt
was so enamored with this strain that
he paid a fortune for just one crippled old mare
of this strain and had her transported back
to his stables in a special cart.

ZAAFARANA

a Saqlawi Queen

As it turns out the lovely white, swift running mare Zaafarana (Balance x Samira) was of this strain and in fact she traces to the mare Ghazieh, one of Abbas Pasha's beloved Saqlawi Jidran of Ibn Sudan mares. The manner in which her illustrious family is handed down is interesting. Ghazieh was obtained from the Bedouin tribes for Abbas Pasha prior to his untimely death. Sometime there after she bore a daughter Horra about 1870 by the Saqlawi Jidran stallion Zobeyni who was also at one time in the stud of Abbas Pasha. Horra was then a producing mare for the great Egyptian breeder Ali Pasha Sherif who was one of the

main buyers of stock from the Abbas Pasha studs. Horra was then mated to Ali Pasha Sherif's stallion Shueyman, resulting in the grey mare Helwa foaled 1875. Helwa then produced in 1887 the lovely grey mare Bint Helwa sired by Ali Pasha Sherif's chestnut Dahman Shahwan stallion Aziz, who also sired the famed stallion Mesaoud. Wilfrid and Lady Anne Blunt had established their Shейkh Obeyd stud in Egypt and also their Crabbet stud in England. When the time of dispersal came for most of Ali Pasha Sherif's stock the Blunts had taken particular interest in the Saqlawi Jidrans of Ali Pasha and wanted very much to have the lovely Bint Helwa

among others. She arrived at Sheykh Obeyd with her filly Ghazala (x Ibn Sherara). Later on Bint Helwa would be shipped to Crabbet in England to be a brood mare for that stud. Shortly after being at Crabbet, there was a running incident where a group of mares rushed through a fence area and Bint Helwa broke her front legs. A special sling was created and she was saved. She was always referred to thereafter as the "broken legged mare." Photos show her to be a very beautiful mare even with her wrapped front legs. Looking at the photos, I cannot help but be reminded of the legend of the old crippled Saqlawi mare for which Abbas Pasha paid a fortune.

BINT HELWA

The "broken legged mare" Bint Helwa, female line of Zaafarana.

Bint Helwa left some influence at Crabbet but her daughter Ghazala who remained in Egypt at Sheykh Obeyd produced two daughters, Jemla and Ghadia [Radia]. Later Ghazala was exported to the U.S. The result of this is that the line of the "broken legged mare" is strongest in Egyptian and American lines. Jemla produced the lovely Serra who established a strong line of her own via Mr. Babson's import Bint Serra [See Desert Heritage n. 14/2008: Serra The Beautiful White Mare]. Radia produced two daughters, Zareefa [1911] who was important in the Inshass stud, and Bint Radia, the dam of Hamdan, Shabloul, and Samira. Samira then produced Zaafarana (x Balance) in 1946. Though not as prolific as the celebrated Saqlawi Moniet El Nefous line, the Zaafarana family is nonetheless a wonderful one. I often think of many of the greys of this family looking very much like their far distant female ancestors such as Radia, Bint Radia and so forth. This family now comes in all colors but it still seems to have a tenacious hold on the admired qualities of its roots.

What was Zaafarana like? Fortunately she was photographed on numerous occasions by Judi Forbis who imported her daughter Ansata Bint Zaafarana in 1959. In her book *Authentic Arabian Bloodstock II*, Judi offers some insight on Zaafarana with descriptions by stud manager General Petko Von Szandtner and also her own reflections. To quote Von Szandtner's notes:

"Zaafarana... Grey, noble. Noble head, large lively eyes, well set on ears, well set on but not very long neck, good withers, sufficiently good back, moderately strong loins, good nice croup, tail set on high, unequal hooves, a little bit weak legs, cannons tied in under the knee, wide and deep, moderately turned out hocks, very slightly toed in, good

ground covering gait."

Judi Forbis notes her impressions:

"At maturity, an attractive and refined mare, long rather ordinary head with good expressive eyes, long well-set neck, long lines, good tail carriage, excellent movement and prideful carriage."

By any standards Zaafarana proved to be a great broodmare. Out of eight foals, three daughters and two sons bred on in Egyptian breeding. What is remembered of her produce is that they were classic Arabians, often of better quality than her and some were great athletes. Her two breeding sons Amrulla (x Sid Abouhom) and Talal (x Nazeer) both enjoyed successful racing careers. Amrulla is sire of the great and beautiful EAO sire Akhtal (x Hagir). Talal was imported to the U.S. and as an aged stallion and remarkably won U.S. National Top Ten. Zaafarana's three producing daughters, El Ameera, Ansata Bint Zaafarana (both by Nazeer) and Nahid (x Sid Abouhom) have continuing families.

Talal was preceded to the U.S. by eight years in the form of his full sister Ansata Bint Zaafarana, imported by Don and Judi Forbis. Everyone who knew Ansata Bint Zaafarana remarked on her beauty and quality. She was one of Don Forbis's favorites and she was a very good

(Nazeer x Zaafarana) imported to the U.S. from Egypt in 1959, a beautifully proportioned mare and an excellent producer. Jerry Sparagowski photo.

producing mare. She produced ten foals all sired by Ansata Ibn Halima (Nazeer x Halima). Most were quite similar in type proving the consistency of Ansata Bint Zaafarana's influence. Unfortunately a few of her produce died young before having a chance to add to her legacy. But several daughters and sons deserve mention.

Ansata Aziza was a beautiful mare in the tradition of her Radia female line and was very successful in the show ring in both halter and performance. She was also a producer of champions. Her handsome son *Ansata Ibn Aziza* (x *Ansata Halima* Son) became an important sire for Zandai Arabians. Her daughter *GA Moon Taj Mahal* (x *Imperial Emperor*) was a celebrated show mare. Not be be outdone, *Taj Mahal's* full sister the beautiful chestnut *GA Moon Taj Halima* produced the famed Egyptian Event Supreme Champion stallion *Farid Nile Moon* (x *Anaza El Farid*) exported to the Ruler of Sharjah. His full sister *Emeraldd Moon* became an important broodmare in the Arabian Horse Center of Kuwait.

Ansata Aziza's full sister *Ansata Zariefa* was also a beautiful mare. However she was not blessed with the bounty of many foals. Her only daughter *Ansata Azalia* (x *Maard*) fortunately had a number of daughters and sons. *Azalia's* daughter *Ansata Zaafina* (x *Ansata Mourad Bey*) became a broodmare for Zandai Arabians, while *Azalia's* daughter *Ansata Zabara* (x *Ansata Halim Shah*) went to Nejd Stud in Saudi Arabia. Her son *Razal Ibn Azalia* (x *Raadin Inshalla*) doubles the Halima blood and also brings in the other Bint Helwa female line via *Bint Serra*.

Ansata Bint Zaafarana's sons were all classic typy individuals. All were full brothers sired by *Ansata Ibn Halima*. *Ansata El Nisr* was shown to U.S. National Top Ten by Don Forbis and became a respected sire. *Ansata Abu Nazeer* became a sire at Glorieta Ranch and his daughters quickly gained admiration as great producing mares resulting in his blood found in many countries now including the Middle East. *Ansata Ali Pasha* was a very beautiful young

stallion with a promising career at Glenglade Arabians. Unfortunately he died young without leaving Egyptian get. Ansata El Alim lived a long life in Arizona. Though he was not available to a large number of mares, he sired some beautiful Egyptians.

In Egypt remained two other daughters of Zaafarana, El Ameera (Nazeer x Zaafarana) and Nahid (Sid Abouhom x Zaafarana). Nahid produced a son and daughter that came to the U.S. Her daughter Nathela (x Nasralla) was a classic mare with beautiful action owned by American actress Jennifer O'Neill. Nahid's son Mazin was imported to the U.S. by Lancer's Arabians as a young horse. I saw him shortly after importation and I was struck by his classic type and very fine skin and clean bone. He was later exported to Morocco. Nahid's other daughter Kalthoom was sired by the ethereal Farazdac, sire of Ikhnatoon, and she remained a good broodmare at the EAO.

El Ameera became a foundation mare for Al Badeia Stud in Egypt. She was very prolific with 10 foals, nine of them were

daughters and only one son. Such a large family extends from her that a separate article could be written about her extended family. She was a full sister to Ansata Bint Zaafarana but was chestnut in color instead of grey and produced all colors. Because she was bred to a diversity of stallions such as Anter, Alaa El Din, El Araby, Abdoun, Kayed and Seef, she has a more diverse representation. Some of her daughters, such as Ferial (x Anter), also had many foals. El Ameera's daughter Sabra (x Alaa El Din) was exported to Germany producing 14 foals.

Perhaps it is El Ameera's last daughter that has regenerated this family world wide. Hasna El Badia was foaled when El Ameera was 26 years old. She came to the U.S. as a yearling and from her daughters added considerable recognition to the Zaafarana line. Her daughter Alia-Zenobia (x Imperial Imdal) was exported to Morocco. Her daughter Alia-Aenor (x The Egyptian Prince) produced Lilly Langtry HG (x The Minstril) dam of BJ Thee Arabella (x Thee Desperado) U.S. National Top Ten and Egyptian Event Supreme Champion mare. Alia-Aenor also produced the full sisters Cheyenne HG

(x The Minstril) and Belle Staar. Belle Staar is the dam of Isabella HG (x Hadidi) multi-Egyptian Event champion and Egyptian Event Supreme Champion. Belle Staar will be forever remembered for her magnificent daughter The Vision HG (x Thee Desperado), dam of international champion stallions Al Lahab (x Laheeb) and Al Maraam (x Imperial Imdal).

It is remarkable really that all the way from the middle of the 1800's to the present day, one man's passion for the Saqlawi Jidran of Ibn Sudan strain has spread to so many who continue to enjoy this long legacy carried forward by the mare whose name begins with the last letter of the alphabet "Z", but is first in so many hearts, Zaafarana. □
